Computer science graduate with one year of professional experience in programming. Demonstrated proficiency in delivering high-quality code. Eager to continue honing my skills and explore new opportunities for growth in the field.

Experience

Junior Software Engineer

Feb 2023 - Sept 2023

Devaxl, Lahore

- Streamlined carrier onboarding within carrier-network of Dispatch-one (Transportation Management System). It provides detailed insights into carrier documents, invitation, truck types, multiple geographical locations and much more to enhance operational efficiency.
- Worked on dispatch-dashboard and settings module in Dispatch-one, It helps to dispatch loads directly to carriers, chatting with carriers and load reporting processes, fostering seamless communication between dispatchers and carriers.
- Utilized React and TypeScript to develop a user-friendly interface and employed Express to create APIs with MongoDB serving as the database.

Game Designer

July 2022 - Oct 2022

Mindstorm Studios, Lahore

- Did apprenticeship program specializing in game development, complemented by hands-on participation in a competitive game jam, resulting in the successful creation of FPS game.

Education

COMSATS University, Lahore

Jan 2019 - Feb 2023

Bachelor of Science: Computer Science

Punjab Group of Colleges, Lahore

Sept 2016 - July 2018

Fsc Pre-Engineering

Projects

AskCUI (MERN Stack Final Year Project)

Feb 2022 - Dec 2022

- AskCUI serves as a one stop comprehensive solution for university students, providing a centralized platform for inquiries, document retrieval, communication, sharing experiences and information on campus amenities including hostels and food points

<https://github.com/UMAIR936/AskCUI>

Write It (MERN Stack Project)

Oct 2021 - Dec 2021

- Developed a MERN Stack website enabling users to access and share blog posts seamlessly, fostering an interactive platform for content creation and consumption.

<https://github.com/UMAIR936/Mern-Stack-Blogging-Website>

Portfolio Website (React.js)

June 2023 - Aug 2023

- Developed an aesthetically appealing website utilizing React.js, effectively showcasing my portfolio, and subsequently deployed it for widespread accessibility and visibility.

umairghaffar.vercel.app

ExpenseTracker (React.js)

Sept 2022 - Nov 2022

- Comprehensive expense tracking app in React, facilitating expense entry, listing, chart visualization, and year-based filtering for effective finance management.
